-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Art Unit: 1712

1. This application contains claims directed to the following patentably distinct species of the claimed invention:

a) The powder coating utilized in a rotor, stator or field coil. A rotor was elected in parent application no. 10/096,807 in the response filed November 7, 2003, page 9.

b) The diepoxides used in the preparation of the epoxy-terminated polyoxazolidone resin such as the diglycidyl ether of bisphenol A elected in the parent application.

c) The curing agents such as the imidazoles elected in the parent application.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species ***within each of items a), b) and c) hereinabove***, for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claims 1-16 are generic.

A reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Art Unit: 1712

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

A telephone call was made to Lainie Parker on January 6, 2006 to request an oral election to the above election of species requirement, but did not result in elections being made. The reply to this requirement to be complete must include elections of the species to be examined even though the requirement be traversed (37 CFR 1.143).

Upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Art Unit: 1712

2. The preliminary amendment filed January 12, 2004 addressing page 1 of the specification does not indicate status of parent application no. 10/096,807 as pending.
3. The specification on page 4, lines 21-22 and claims 4, 6 and 8-16 denotes diglycidyl ethers of novolacs. Epoxy resins derived from novolacs contain multiple epoxy groups by virtue of the epoxidation of the multiple phenolic hydroxyl groups of the novolac resin with an epihalohydrin. More favorable consideration would be given to the definition of the novolac epoxy resins as "polyglycidyl ethers of novolacs."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Robert Sellers whose telephone number is (571) 272-1093. The examiner can normally be reached on Monday to Friday from 9:30 to 6:00. The fax phone number for the organization where this application or proceeding is assigned is (571) 273-8300.
